- Key relevant areas of research
 - Cohort study “Ageing in Leganes” part of the CLESA study
- Staff involved
 - Angel Otero. Prof. of Preventive Medicine and Public Health

Project Coordinator

Partners

Work Package involvement: Leader WP2 Training

Objectives

1. To provide trainers and interviewers a basic knowledge about the ICF, as a common framework for the instruments developed for COURAGE in Europe.
2. To provide technical and practical information about the survey protocol, covering the discussion of confidentiality procedures, from data collection, cleaning, analysis, transfer and reporting.
3. To provide interviewers skills on the computer assisted (Computer Administered Personal Interview – CAPI) or paper-pencil (Paper Administered Personal Interview – PAPI) version of COURAGE in Europe survey material.
